## Diagnostics

If your computer is slow, not saving files correctly, or something just doesn't seem "right", call ABC Computer Care. We specialize in diagnosing and fixing whatever may be wrong with your desktop or laptop computer. Some of the problems we routinely fix include:

- \*Unable to connect to internet
- \*Non working CD or DVD drive
- \*Missing drivers for sound, video or modem cards
- \*Software conflicts
- \*Programs not running at startup as the user wants.

## Virus Removal

Has your computer been rebooting at odd times or not starting at all? If you suspect a virus may be the problem, ABC Computer Care has several technicians trained to find and remove viruses and get your computer back to normal.

Data Recovery

When you lose data due to a hard drive crash or a virus, we can usually recover more than 80% of the files from your computer, allowing you to continue using the applications you've become comfortable with, such as email, web browsing, and accounting.

James A Miller  
proprietor

A local store catering to the needs of novices, experienced computer users and every level in between. We address every problem local computer users may have. In addition to in-shop service, we make service calls to both homes and offices.

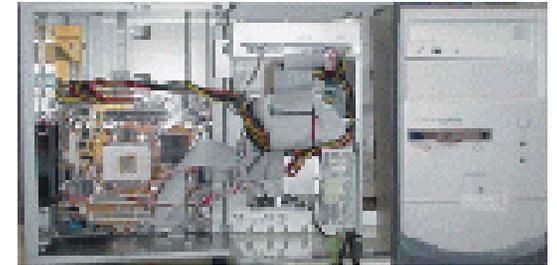

## Networking for Home and Office

We offer networking solutions for both home and office clients, with ABC service technicians going into the user's workspace to connect networks of computers ranging from 2 to over 100 for a corporate setting. Configuring routers, hubs, switches, and protocols, we take all the hassle out of setting up a network. This includes setting up internet services to be shared by multiple computers using a switching hub or router, wireless or not, as you choose.

## Ready-to-Use Computer Systems

We offer several choices in preconfigured systems, from basic systems used for word processing and web surfing to more complex systems that can be easily optimized for gaming or graphic editing.

Systems Built to  
Your Specifications

Our technicians can build a PC tailored to your needs, including your choice of motherboard, CPU, memory, hard drive, video and sound cards, as well as CD, DVD and/or CD/DVD rewritable drives.
